

2. (AMENDED) A composition as claim in Claim 1 in which the avermectin or milbemycin is milbemycin, ivermectin, doramectin, moxidectin, nemadectin, abamectin or a compound of the partial formula (i)

(i)

wherein R¹ is an optionally substituted amino or imino group, such as optionally O-substituted oxyimino, optionally N-substituted hydrazone or optionally N-substituted semicarbazone, and R² to R⁵ are the same or different and each is hydrogen or an organic radical which is selected from the group consisting of alkyl, alkenyl, alkynyl, aryl, heterocyclic, mono-, bi- and tri-cycloalkyl, mono-, bi- and tri-cycloalkenyl and aralkyl, or any two of R² to R⁵ may be taken together with the carbon atom(s) to which they are attached to form cycloalkyl, aycloalkenyl, aryl or heterocyclyl group.

B 3. (AMENDED) A pharmaceutical composition comprising at least one anthelmintically active compound which is an avermectin or milemycin, in the form of a complex with at least one cyclodextrin; wherein said anthelmintically active compound is represented by formula (I):

(I)
